

Economic Outlook

Detroit Association for Business Economics
Detroit, MI
February 19, 2015

William Strauss
Senior Economist
and Economic Advisor
Federal Reserve Bank of Chicago

The “Great Recession” ended in June 2009 and GDP expanded by 2.5% last year

The “Midwest” economy has performed well over the past year

Real existing home prices fell by 40%, but have begun to rise

The forecast calls for a very gradual recovery in housing

The stock market has improved since March 2009, and has surpassed its previous peak

Blue-Chip is expecting GDP to grow somewhat above trend over the next two years

The Federal Open Market Committee (FOMC) expects GDP to grow somewhat above trend over the next three years

The path of the current recovery is restrained compared with past deep recession recovery cycles

Employment grew by over 3.2 million jobs over the past 12 months

**After peaking in October 2009,
the unemployment rate has fallen by
4.3 percentage points**

However, the labor force participation rate fell to a level last seen in 1977

Civilian Labor Force Participation Rate and Population Share 16 and Older by Age Category, United States, 2007 and 2014

	Labor Force Participation Rate (%)			Population Share (%)		
	2014	2007	Change '07-'14	2014	2007	Change '07-'14
Population						
16 and older	62.9	66.1	-3.2	100.0	100.0	0.0
16 to 24	55.0	59.4	-4.4	15.6	16.1	-0.5
25 to 34	81.2	83.3	-2.1	17.0	17.1	-0.2
35 to 44	82.2	83.8	-1.6	16.0	18.3	-2.3
45 to 54	79.6	82.0	-2.4	17.3	18.8	-1.5
55 to 64	64.1	63.8	0.4	16.0	14.0	2.0
65 plus	18.6	16.0	2.6	18.1	15.6	2.5

The share of those unemployed more than 6 months remains significantly high

Employees working part time for economic reasons remains elevated

Wages and benefit costs have increased over the past year, but still remains relatively low

The unemployment rate is forecast to edge lower with an additional 2.7 million jobs projected for 2015

The FOMC forecasts that the unemployment rate will be at the natural rate at the end of this year

Inflation is declining

Personal consumption expenditure - chain price index

percent change from a year earlier

In large part due to the collapse of energy prices

Natural gas prices have also declined and remains low

Expenditures on energy are below the historical average

Low oil prices benefit most states

(Effect of a 50% decline in oil prices on employment)

Percent change in total employment

Red	<-2	Light Red	-2 to 0	Light Green	0 to 1	Dark Green	>1
-----	-----	-----------	---------	-------------	--------	------------	----

Removing the volatile food and energy components from the PCE, “core” inflation remains low

Personal consumption expenditure - less food and energy -
percent change from a year earlier chain price index

Inflation is forecast to rise 1.1 percent in 2015 and 2.3 percent in 2016

The FOMC anticipates that PCE inflation will remain below two percent through 2017

Personal consumption expenditure - chain price index

percent change from a year earlier

The FOMC anticipates that “core” PCE inflation will also remain below two percent through 2017

Blue Chip International Consensus Forecasts

	Real GDP % change Annual			Inflation % change Annual Consumer Prices			Exchange Rate Against US Dollar End of Year	
	2014	2015	2016	2014	2015	2016	2015	2016
United States	2.4	3.2	2.9	1.7	0.4	2.3	-	-
Canada	2.4	2.3	2.3	2.0	1.2	2.1	1.21	1.19
Mexico	2.3	3.3	3.8	3.9	3.6	3.6	14.03	13.75
Japan	0.6	1.0	1.4	2.7	1.2	1.4	123.5	127.2
South Korea	3.4	3.5	3.6	1.4	1.4	2.1	1,097	1,091
United Kingdom	2.6	2.6	2.5	1.5	0.7	1.7	1.49	1.51
Germany	1.5	1.4	1.8	0.9	0.5	1.4	1.11	1.07

Brazil	0.2	0.3	1.7	6.3	6.4	5.6	2.79	2.85
Russia	0.2	-3.4	0.3	7.6	12.4	7.0	62.4	60.5
China	7.3	6.9	6.7	2.1	1.7	2.2	6.21	6.16
India	5.8	6.1	6.6	7.0	5.5	5.7	63.2	63.1

Blue Chip Economic Indicators Forecast February 10, 2015

The real trade-weighted dollar has increased 8.9% over the past six months

Since the beginning of the expansion manufacturing output has been increasing at a 4.8% annualized rate and has recovered 115% of the output during the recession

While manufacturing jobs have been rising, they have only recovered 38.2% of the jobs lost during the downturn

Capacity utilization is getting very close to full utilization

Average weekly hours for private workers has recently moved higher

**However, average weekly hours for manufacturing are at extremely high levels:
the highest working week since World War II**

The recovery has also been broad-based with vehicle and primary metals manufacturing leading the way

Industrial output: June 2009 - January 2015

Light vehicles sales have reached pre-recession levels

The New 2015 F-150

500 pounds lighter by using aluminum

EcoBoost 2.7 liter V-6

Fuel economy increases by 5-20%

Prices range from \$26K-\$60K+

Will this new design be accepted by the consumer?

“High-strength, military grade, aluminum-alloy body”

The “Old” 2015 GMC Sierra

“When redesigning the GMC Sierra, engineers relied on roll-formed steel, the same material found in the hulls of submarines. Big ones.”

Vehicle sales are forecast to rise around 3% this year and 1% next year

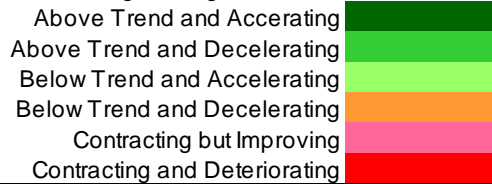

The purchasing managers' index has moderated over the past few months

The industrial sector has performed very well over the past 5 years

Current 3 Month Moving Average Growth is:

Manufacturing Industries Activity Chart Growth (3-month moving average) compared with the most recent 5-year trend

Industrial production is forecast to rise at a pace above trend in 2015 and 2016

Credit spreads between Corporate High Yield securities and Corporate Aaa securities have remained low, but has been inching higher since the middle of 2014

**Monetary policy has been very aggressive,
keeping the Fed Funds near zero since December 2008**

The Federal Funds Rate is anticipated to return to the neutral rate by the end of 2017

The asset side of the Fed's balance sheet has expanded in size and in composition

The money supply (M2) is nearly 3 times bigger than the monetary base

The Fed's expansion of the monetary base has allowed the money supply to continue rising, compared with what took place during the 1930s

Monetary expansion 1929-1936

index: Jan 1929 = 100

Monetary expansion 2007-current period

index: Jan 2007 = 100

Summary

- The outlook is for the U.S. economy to expand at a pace somewhat above trend in 2015 and 2016
- Employment is expected to rise moderately with the unemployment rate edging lower
- Slackness in the economy will lead to a relatively contained inflation rate
- Growth in manufacturing output should be above trend over the next two years
